License banner visible in Confluence 7 despite valid license

**Affects:** Users running Confluence 7 and Refined versions 6.1.7 to 6.1.11.

**Fixed in release 6.1.11**

You may need to manually enable the modules as instructed below, but making sure you are on version 6.1.11 or higher will fix the issue for when you restart Confluence in the future.

**Release notes 6.1.11**

**Symptoms**

After upgrading to Confluence 7 and Refined 6.1.7 or higher, there is a license banner visible on pages stating that you do not have a valid license.

**Cause**

Resources within Confluence are not made available in the order necessary for Refined app to function properly, and all modules in Refined are not enabled.

**Solution**

1. Go to manage apps
2. Expand Refined app
3. Locate the modules of Refined, one should be disabled when you see this issue, then enable that module.
**Status**

We are working on a fix for this. If you have any question, you are welcome to contact our support.
