**Space Layout**

**About the Space Layout**

A Space Layout is what surrounds the pages of a space. By setting up different Space Layouts you can customize what the users sees on the space and adapt it for different scenarios.

You can change the space layout on a **global** level and on **individual** spaces, and you can also make **templates** to reuse on several spaces.

**Go to**: Cog > Theme Configuration > Layout to edit the global space layout or the templates

**OR**

**Go to**: Space Menu on a space > Space Layout

**On this page**

- Space settings
- Space types
- Edit Space Layout

- Editing Permissions
  - Attachments
- Placeholders
Space settings

The space layout editor works in a similar way as the Site and Category Layout Editors. You can add/remove items and macros, and move them around by dragging and dropping. You can also restore the layout to a previous version or start from a predefined space type.

In the space layout you can now specify settings for the space by using the checkboxes in the editor.
### Space Layout Settings Glossary

<table>
<thead>
<tr>
<th>Space Setting</th>
<th>Description</th>
<th>Screenshot</th>
</tr>
</thead>
<tbody>
<tr>
<td>Space logo</td>
<td>Select to display a logo (independent of the site logo).</td>
<td><img src="image" alt="Space Logo" /></td>
</tr>
<tr>
<td>Templates</td>
<td>Choose from our neat ready made templates or customize your space template.</td>
<td><img src="image" alt="Template Selection" /></td>
</tr>
<tr>
<td>Concealed menu layout</td>
<td>If you are using a space for information and not collaboration, this is a great way of showing a clean space.</td>
<td><img src="image" alt="Concealed Menu Layout" /></td>
</tr>
<tr>
<td>Show/Hide Meta Data</td>
<td>This is the automated text under the page title.</td>
<td><img src="image" alt="Show/Hide Meta Data" /></td>
</tr>
<tr>
<td>Show/Hide Likes, Labels and Comments</td>
<td>To include or remove liking, adding labels or comments.</td>
<td><img src="image" alt="Show/Hide Likes, Labels and Comments" /></td>
</tr>
<tr>
<td>Space Siblings</td>
<td>Select to add a dropdown list of spaces within the category or subcategory. This can be useful for a technical documentation use case to represent different versions.</td>
<td></td>
</tr>
<tr>
<td>Concealed menu layout</td>
<td>Select to bundle the space tools and menus, along with page information in a single inline dialog to give the pages in this space a cleaner look. See Space Types for more information.</td>
<td></td>
</tr>
<tr>
<td>When not concealed (default):</td>
<td></td>
<td></td>
</tr>
<tr>
<td>When concealed:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Meta data</td>
<td>Show or hide the page metadata (who created the page, and when last modified).</td>
<td></td>
</tr>
<tr>
<td>-----------</td>
<td>--------------------------------------------------------------------------------</td>
<td></td>
</tr>
<tr>
<td>Labels</td>
<td>Show or hide labels on pages.</td>
<td></td>
</tr>
<tr>
<td>Likes</td>
<td>Show or hide like functionality for the space.</td>
<td></td>
</tr>
<tr>
<td>Comments</td>
<td>Select to allow comments on a space.</td>
<td></td>
</tr>
<tr>
<td>Children</td>
<td>Select to list the children pages at the bottom of a space.</td>
<td></td>
</tr>
</tbody>
</table>

Space types

The space layout editor comes bundled with some predefined Space Types.

The space types will only modify layout settings and macros/content items. The content or structure of the space will remain unchanged. The space types works great together with Confluence space blueprints.

The bundled space types are:

<table>
<thead>
<tr>
<th>Space Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Breadcrumbs</td>
<td>Unselect this if you don’t want to show Atlassian’s page breadcrumbs function on a space</td>
</tr>
</tbody>
</table>
The default space type is what will be used if no custom changes are made. This type includes a page-tree macro as well as a space news macro with general settings which works great in most situations.

The documentation space type makes use of the *Space siblings* setting, making navigation between different documentations and versions easier. This type includes a space search bar to find content within a space fast.

This space type gives your space a public facing look, highlighting the page content for reading by hiding space tool menus. The page-tree is configured to give a cleaner presentation as well.

You can create your own Space Layout type and apply it to as many spaces as suit.

### Edit Space Layout

**Global level**

Go to: Confluence Admin > Global Space Layout

**Individual space level**

Go to: Space Admin > Space Layout

To learn more about how to create a custom space layout visit our [step by step video guide](#).

### Listing custom space layouts

An administrator can see a list of all space layouts that have been modified. To do this go to Browse > Confluence Admin > Layouts > Spaces with custom layouts and press View.

From this list the administrator can view and edit these space layouts directly.
Editing Permissions

Only confluence administrators and space admins for a space can edit the space layout. On global level, only confluence administrators can edit the layout.

Attachments

Attachments uploaded when editing a space layout are uploaded to the Home page of the space.

Placeholders

Setting up your Space Layout, you can make use of Placeholders to make the content aware of its context and what user is logged in. Learn more here: Space Layout.
