

Modules

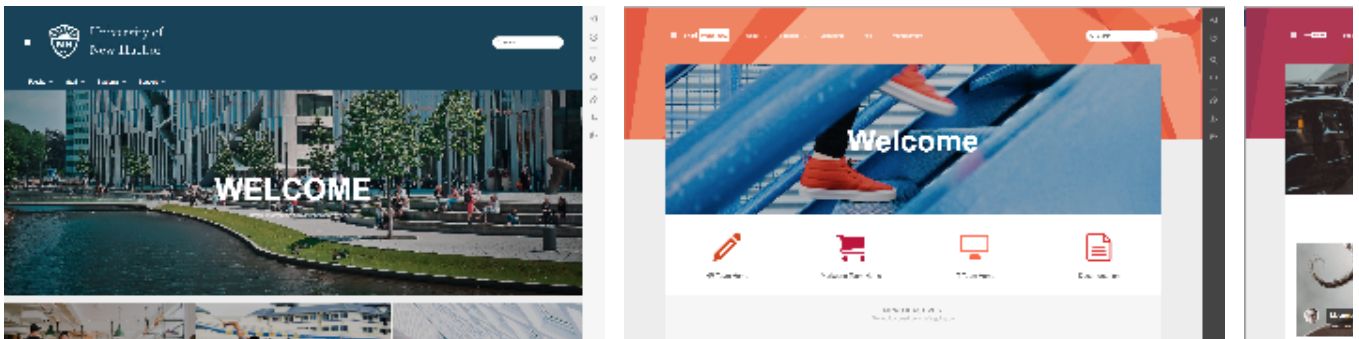

Building your home with modules

Modules are used on [homes](#) to show content, whether it is activities happening around your site, links to commonly used pages, information or navigation help.

Use modules to highlight and display what your users need to know about.

Combining modules and themes, you can get your homes to look and feel like they are your homes.

If you want to see these sites in action, you are welcome to visit our demo page, click here: [Refined demo page](#).

Refined modules

Activity Stream Module	Navigation Image Module
Confluence Content Module	News Module
HTML Module	Pages Module
My Work Module	Search modules in RefinedTheme
Navigation Cards Module	Spaces Module
Navigation Content Module	User Details Module
Navigation Highlight Module	Users In Category Module
Navigation Icon Module	Users Module

Working with modules

Modules are available on every home. Each module has its own feature set and you can configure it to match what you want to display.

If you are wondering about what a particular setting does, click on the info *i* to get more information.
