

Style the theme with custom CSS

- [Global level](#)
- [Global level with Refined](#)
- [Space level](#)
 - [Permissions](#)
- [Examples](#)
 - [Hide Breadcrumbs](#)
 - [Hide power by footer](#)
 - [Hide dashboard button](#)

Global level

Go to: Confluence Admin > Look and Feel > Stylesheet > Edit

This will affect all pages in the entire wiki. This will also remain as part of Confluence to run even if Refined is disabled or uninstalled.

Global level with Refined

Go to: Refined Administration > Themes > scroll to the bottom of the page to find Custom CSS and HTML

This will affect all pages in the entire wiki, but it is packaged with Refined, meaning that if you uninstall or disable Refined, this will not be applied.

Space level

Go to: Browse > Space Admin > Look and Feel > Stylesheet > Edit

This will affect all pages in the active space.

Permissions

A Refined for Confluence acts a Confluence in general when it comes to permission, you can read more about who can apply css here: [Styling Confluence with CSS](#).

Examples

Hide Breadcrumbs

```
#rw_breadcrumb, #rw_page_breadcrumbs
```

```
{  
    display:none !important;  
}
```

Hide power by footer

```
#rw_footer
```

```
{  
    display:none !important;  
}
```

Hide dashboard button

```
#rw_category_menu li.rw_first
```

```
{  
    display:none !important;  
}
```
