

Confluence page render support

When using Refined for Cloud, Refined is rendering the content of Confluence pages on the Refined site whenever a Confluence space is added to a Refined Site.

- Refined supports the **new page editor** for rendering Confluence pages.
- For macros added to Confluence pages, Refined continually add support for macros.

This page aims to provide information about what can be rendered in the Refined cloud.

Please note that **Refined does not change any functionality of the rendering of pages in Confluence cloud**, Refined operates separate from Confluence Cloud.

Main formatting features

Name	Support	Comment
Text	SUPPORTED	
Headings	SUPPORTED	
Paragraph	SUPPORTED	
Bullet list	SUPPORTED	
Ordered list	SUPPORTED	
Media	SUPPORTED	
Panel	SUPPORTED	
Layouts	SUPPORTED	
Tables	SUPPORTED	
Emoji	SUPPORTED
