

# Moving between Refined Mobile and Desktop

## Going to Refined Mobile interface

Depending on the settings for Refined Mobile configuration, users might be automatically directed to the mobile interface when accessing on a mobile device.

You can always visit the mobile interface by pointing your mobile browser to: `youBaseURL/m`

## Going to Confluence Desktop

In the footer of your Refined Mobile, find "Classic".

Note: If you have Confluence Web mobile interface enabled, you might end up in Confluence Web Mobile. [Learn more here:](#)
